**General Health of the District.**

This has remained very good.

**Notifiable Infectious Diseases.**

Scarlet Fever	4
Whooping Cough	16
Diphtheria	5
Measles	14
Puerperal pyrexia	1

## Immunisation against diphtheria.

This District has been incorporated in the Wiltshire County Council scheme for the control of diphtheria. A large proportion of children, both of school age and pre-school age, had already been immunised in 1940 and 1941, and a further number received their first inoculation at the end of 1942.

The following table shews the number of children who received complete immunisation in the year 1942. \* indicates that most children were immunised in 1941, hence the low numbers in these cases.

Parish	Children of	
	School age.	Pre-school age.
Atworth ...	74	1
Broughton Gifford ...	114	23
Hilperton ...	92	40
Holt ...	19	23
Limpley Stoke (see Winsley)		
Melksham Without ...	12*	—*
Monkton Farleigh ...	9	18
Semington ...	46	13
South Wraxall ...	—*	—*
Staverton ...	57	26
Westwood ...	6*	4*
Wingfield ...	—*	—*
Winsley, including Limpley Stoke	13*	21

## General.

Apart from the above details, little can be added to this Report. Many problems had to be settled, but these need not be detailed at this stage. It has been more important to carry out the work than to sit down and write about it.

JEAN MURRAY, M.B., CH.B., D.P.H.

D. LEIGH SPENCE, M.A., M.B.

*Medical Officers of Health.*

May, 1944.
